designed to help you understand the overall cost of the

personal loan. It combines the amount of the loan, loan term, repayment frequency, interest rate, fees and charges into a single rate to show the total true cost of the loan. The comparison rates for the NOW Finance loans are based on a loan of \$30,000 over 5 years. WARNING: The comparison rates given are true only for the examples given and may not include all fees and charges. Different terms, fees or other loan amounts might result in a different comparison rate. Due to the fact NOW Finance does not charge any establishment, account keeping or early repayment fees, the true cost of the loan or Comparison Rate will always equal the interest rate quoted.
